SERVING EXCELLENCE IN ELECTRICALS SINCE 1979

Al Hathboor Electricals has efficaciously served the Construction, Oil & Gas, Marine and Industrial sectors like Residential, Commercial, Mixed Use, Schools, Malls, Hospitals, Hotels, Theme Parks, Ports, Airport, Cruise Terminals etc. of the UAE, since its foundation in 1979. Al Hathboor Electricals is deemed as one of the most reliable sources for supplies of high quality electrical and automation solutions in the region. AHE assists with all the electrical needs right from the inception to the completion of any project.

AHE's key strengths are its several prominent brands, a highly skilled and experienced workforce and an superior distribution network. In time, these factors have helped AHE to live up to the challenges of an exceptionally demanding market. The passion to meet the rising industrial and commercial requirements in the UAE and the Gulf added substantially to AHE's Growth. AHE swears by the motto that successful companies are built by the ambition and efforts of the people behind them, which has helped the company to strengthen a successful reputation.

Brand Portfolio

BRANDS THAT POWER YOUR WORLD

Our portfolio includes global brands such as ABB, Legrand, Barton, 3M, BICC, Rexton and more, servicing projects across sectors including construction, oil & gas, marine, hospitality, and healthcare.

legrand®

Wiring accessories | Floor system

Legrand is the global specialist in Electrical and Digital Building Infrastructures. They offer high-value products for commercial, residential, and industrial buildings, fostering connected spaces and sustainable electricity worldwide. Their extensive product range, including power distribution, cable management, and digital infrastructures, makes them a global benchmark.

ABB

Disconnecting Switches | Isolators & Solar System

ABB is a global technology leader driving societal and industrial transformation towards a productive, sustainable future. Connecting software to its electrification, robotics, automation, and motion portfolio, ABB pushes technological boundaries. With over 130 years of excellence, their success is fueled by 110,000 employees across 100+ countries.

**BARTON
Engineering**

GI Conduits | Accessories |
Trunking | GI Box

Barton Engineering®, Liberty Building Solutions FZE's flagship brand, is a market leader in rigid and flexible steel conduits, GI trunking, and associated fittings. This UK brand has been present in the Middle East for over 40 years, extensively used in prestigious regional mega-projects like Burj Khalifa, EXPO 2020, and Ferrari World.

TekLink

Weather Proof Isolators

A robust range of weatherproof isolating switches designed for outdoor durability and safety, offering single, double, and triple pole options from 23A to 63A with a base-mounted mechanism for easy termination and added wiring space.

Tapes | Ties | Lubricants, Resin Joints, Cold Shrink | Termination & Joints

3M's Electrical Products Division provides comprehensive solutions for the electrical industry. They offer a wide range of products including insulating tapes, resins, power cable splicing/terminating kits, cold/heat shrink solutions, arc/fire proofing tapes, and various heat detection devices, catering to diverse electrical needs.

Flexible Conduit | Accessories

Kopex, founded in 1947 and part of ABB since 2012, offers reliable flexible conduit systems. These systems protect critical power and data cabling in transport, construction, and industrial applications. With over 65 years at the cutting-edge, Kopex ensures quality manufacturing backed by global accreditations.

BICC COMPONENTS

Cable Glands | Lugs | GI Box

BICC Components, globally recognized manufactures world-class brass, copper, and steel components for the electrical industry. Their product range includes industrial and hazardous area cable glands, connectors, cleats, earthing & lightning protection, steel back boxes, and terminal blocks, all certified to relevant BS EN and IEC Standards.

PVC Conduit | Accessories | GI Box

Rexton Technology, fully supported by Kingston Holdings FZC, features extensive in-house manufacturing, tool making, QC, and powder coating. This includes modern European moulding and extrusion machines for Dry Lining Boxes, Conduit, and Accessories, plus local production of Switch/Socket, Metal Adaptable, and Floor Boxes. Rigorous LED testing ensures quality.

Earthing & Lightning Protection

nVent ERICO is a global leader in electrical protection solutions, with over a century of expertise. They specialize in grounding, bonding, lightning, and surge protection, safeguarding structures, equipment, and people in diverse markets including rail, commercial, and industrial. Their engineered solutions and products like Cadweld provide reliable protection from the ground up.

Service Boxes | Modular Enclosures

Alfanar is a global project developer and technology solutions provider, known for manufacturing and trading a comprehensive range of electrical products. This includes expertise in Service Boxes and Modular Enclosures, alongside low, medium, and high voltage equipment. With over 45 years of experience, they deliver turnkey EPC solutions for energy and infrastructure worldwide.

Low Voltage Power Gear | Control Gear

Power Centre Gulf is part of the Al Hathboor Group engaged into manufacturing of Low voltage power gear and control gear. Associated with various multinational brands. Since its establishment in the year 2007, the PCG has the experience of executing small and mega projects within UAE and outside UAE

MCB | MCCB | RCCB

Hager provides expert solutions for electrical installations in residential and commercial sectors. They offer integrated room solutions, efficient energy distribution and management, and cable management. With products designed in Europe and produced across 23 global sites, Hager serves customers in over 120 countries, ensuring lasting quality, ease of use, and peace of mind.

BAND-IT

Stainless Steel Cable Ties

BAND-IT has a long tradition of designing innovative fastening solutions for harsh environments. Their clamps are engineered for cable management, identification, and insulation across diverse global applications, from aerospace to sub-sea. Delivering robust performance in mission-critical tasks, BAND-IT serves sectors like Oil & Gas, Automotive, Construction, and Military.

Indoor Lighting | Outdoor Lighting

RR Lighting, part of the USD 850 Million RR Global conglomerate, offers an exceptional range of over 200 high-quality LED lighting products. Present in over 85 countries, they provide indoor, outdoor, and light source solutions crafted with innovative technology to beautifully illuminate spaces. All products are CE, CB & ROHS compliant, ensuring optimum quality and safety.

Earthing & Lighting Protection

CATU, an electrical safety leader for a century, became a subsidiary of the SICAME Group in 1996. Their extensive expertise and strong partnerships with energy stakeholders, including EDF, have earned them a global reputation. CATU now boasts numerous worldwide subsidiaries, with its brand sold across all continents.
